About the Webinar & Concept Note:

By directing civilization with innovative dimensions Literature cultivated and disciplined society towards the progressive ways. Humanity is that feature which makes man a good human being, social creature and provides a status to be called a true citizen. The religion of the literature is not only to make a society sensible but also makes him aware about his accountability towards universal brotherhood on the perspectives of generosity. It's evident in history that Literature performed its responsibility through its different genres and forms with all its intensity.

When we look at the second half of the 20th century, we realized that the many forms and genres of literature seemed to have degenerated; nevertheless many new forms enriched the literature in the following period.

When we look at the present time; we realize that there are immense challenges before 21st century. One of the many reasons for the same is the revolution in information technology during the last three-four decades. The present form of literature, concerned areas of literatures, subject matter of creativity and process, language-style-beauty, role of academics for literary creativity, approach of present generation for literature, expectations from literature, marginalization of literature, etc. are such serious issues that needs to be discussed so that reasons of indifference towards literature will be pointed out and we will get a remedial approach thereof.
